PROFESSIONAL EXPERIENCE

Frontend Developer
Capstone Project - Eller Labs – Remote – Toronto, Canada
January 2025 - April 2025

- Developed responsive admin portal and customer-facing web and mobile apps using React.js, JavaScript, and Firebase.
- Implemented authentication and dynamic dashboard functionality with user-based access control.
- Integrated REST APIs for course registration and progress tracking.
- Contributed to backend structure using Firebase Realtime Database and Fire store.
- Conducted user testing and applied UX/UI improvements, boosting usability by 35%.
- Implemented Git version control and deployed applications using Vercel.

Financial Accountant
Niger Dock FZE – Lagos, Nigeria.

- Utilized double-entry accounting and rigorous validation techniques to ensure accurate daily general ledger entries.
- Leveraged strong mathematical skills to compute and verify figures within accounting systems, minimizing errors.
- Reconciled accounts monthly by cross-referencing general ledger with bank statements, ensuring financial accuracy.
- Streamlined data collection and input into Orion ERP software, enhancing efficiency and data integrity.
- Delivered precise financial reports and maintained up-to-date ledgers and journals, improving transparency.
- Applied consistent coding to invoices, files, and receipts, optimizing record organization and searchability.

_____

PROJECTS

Driving School App

- Developed a web application for a driving school using React and JavaScript.
- Implemented features for scheduling lessons, tracking progress, and sending notifications.
- Integrated with a backend API for user management and booking data and Firebase for data storage

Rent Hub Website

- Built a rental management web application using React and MongoDB.
- Enabled users to browse, book, and manage property rentals with real-time updates.
- Utilized Tailwind CSS for responsive UI and MongoDB for data storage.

News App

- Developed an iOS news application using Swift, MVC, CoreData, and REST API integration.
- Supported landscape and portrait orientation using AutoLayout.
- Allowed users to save articles for offline reading.

Quiz Builder App

- Created a quiz application for iOS using UIKit and Storyboard.
- Enabled quiz creation with a dynamic form and options A-D per question.
- Stored data using local storage with CoreData.

_____

TECHNICAL SKILLS

JavaScript, React.js, HTML5, CSS3, Node.js, Express.js, MongoDB, Swift, UIKit, Firebase, REST APIs, Git, Figma, CoreData, SQL, Next.js

TRANSFERABLE SKILLS

Client Communication, Team Collaboration, Documentation, Data Analysis, Detail-Oriented, Problem Solving, Financial System Knowledge, Process Automation, Time Management, Task Prioritization, Learning Agility, User Focused.

CERTIFICATIONS

Ontario College Certificate- Information Technology

EDUCATION

Diploma - Information Technology Solutions
Humber College Polytechnic Institute - Canada

B.Sc. Accounting (Prior Degree)
Babcock University - Nigeria
